

UTILITY OVERSKIRT

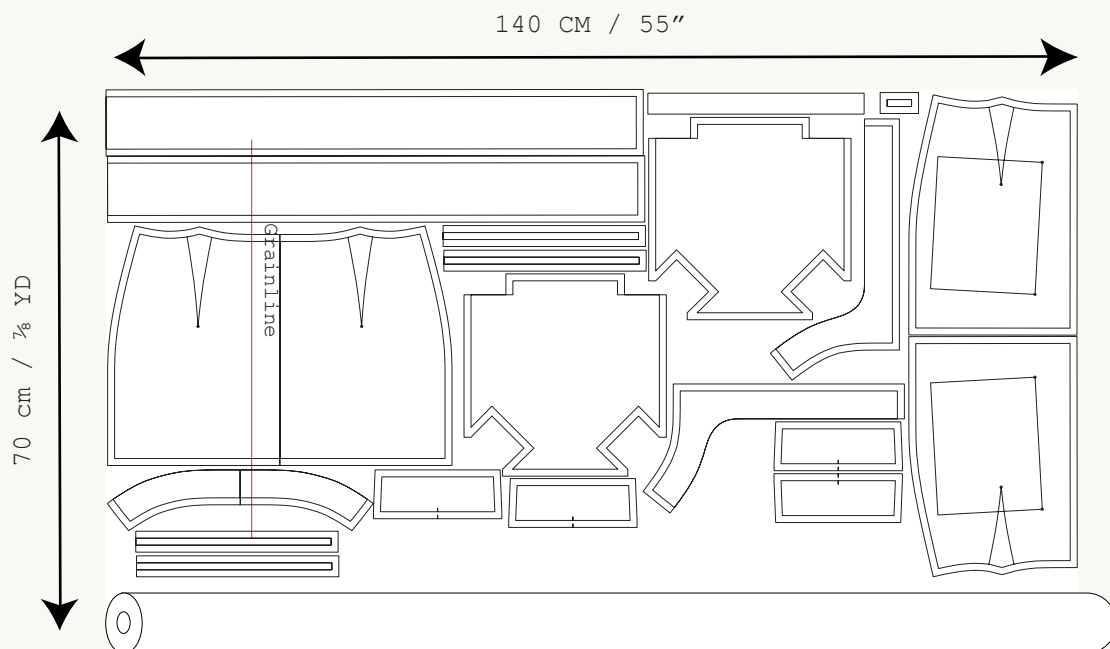

NOTE:

Whenever possible, these cutting plans use the cross grain to make the most efficient use of the fabric. This is mainly done for pieces that won't be visible on the finished garment, such as facings or the under-side of pocket flaps.

The cross grain is still a straight grain, running perpendicular to the lengthwise grain, so these pieces will remain stable and won't distort as they would if cut on the bias.

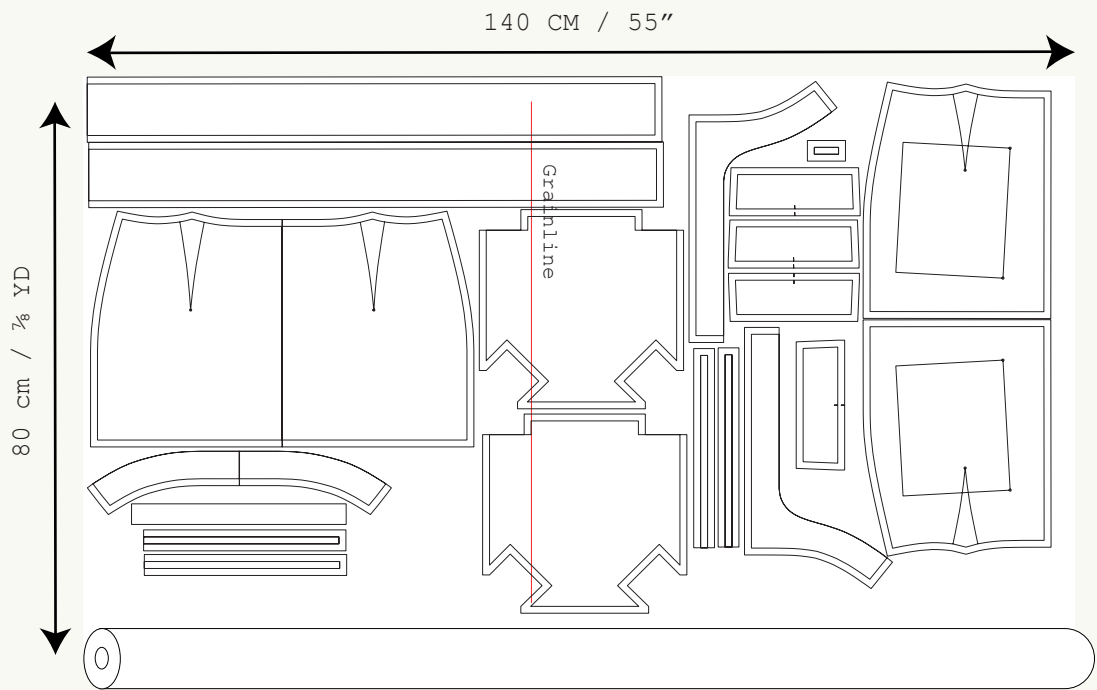

Fabric width 140cm/55"

Sizes A to B

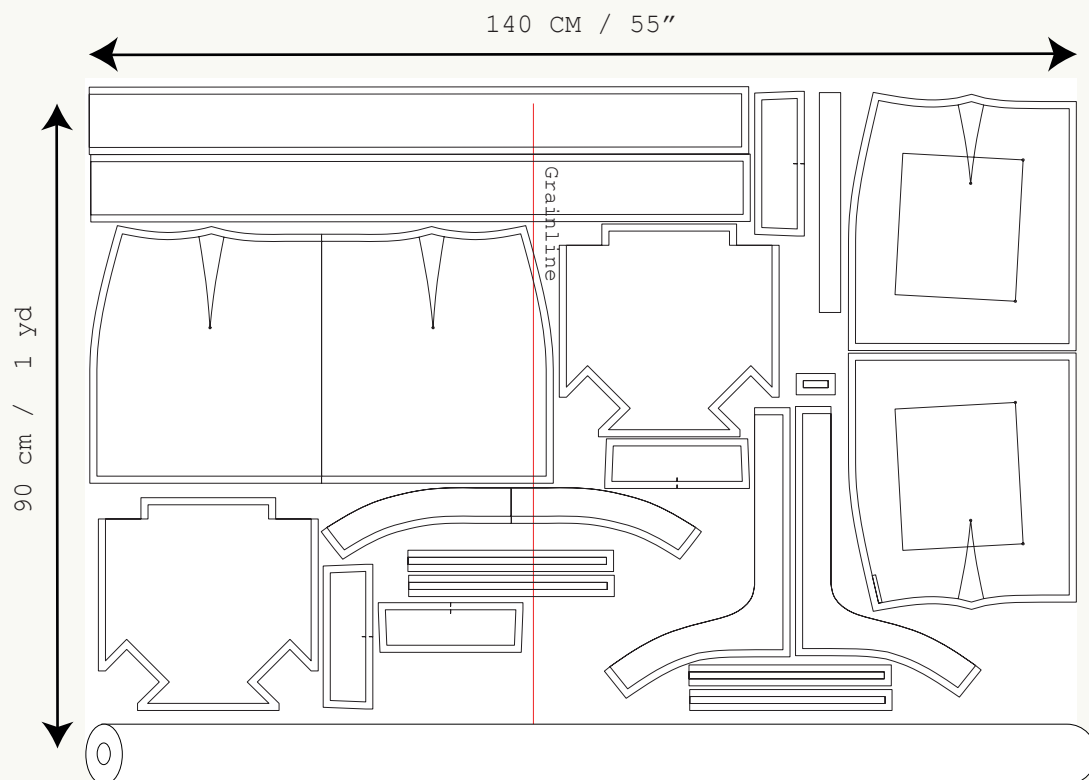

Fabric width 140cm/55"

Sizes C to E

Fabric width 140cm/55"

Sizes F to I

Fabric width 140cm/55"

Sizes J to L
